salesforce

A versatalist in IT who has handled multiple technology , projects and roles across the globe. A proven leader who has build practices from the ground up with an ability to learn new technologies in short period of time.

Representative Project Work

Company : PwC, India

Role : Solution Architect , Salesforce Practice, From April 2017

Project 1 : Data science integration with Marketing cloud (Insurance sector)

Implemented a project involving segmentation using data science and importing the segmented data into marketing cloud to run campaigns. Involved creation of setups on enhancedFTP folder, setting up of automation events , defining journey builder flows and tracking responses from campaigns using engagement split activities. Targeted campaigns to different segments of customers using Email studio and content builder tools. Data modelling to capture complex subscriber attributes to be used in email content dynamically using AMP scripting. Configured custom preference center using cloudpages to capture customer preferences and storing the data in Sales cloud to track preferences. Synchronizing data between service cloud and marketing cloud using marketing cloud connector. Capturing of customer Enquiries using cloudpages , setting up of profile center and validations using tools on email content to check CAN-SPAM compliance.

Other activities owned in Marketing cloud knowledge area

Started a practice by training 20 resources in Marketing Cloud. Developed a PoC integrating Service cloud , Marketing Cloud, cloudpages , Google Machine learning API and Data Science using R. Experienced with Journey builder , content builder , automation Builder , audience builder and email configuration. Handling proposals and opportunities from US , Brazil , UK and AsiaPac. Presentation to partners and clients related to opportunities , PoC and giving capability demos to partners and clients.

Project 2 : OneForce SFDC CRM implementation. (Real Estate)

Team Size : 25

Integrations : 11 applications

Framework : Lightning Components, Aura framework with SLDS

Real estate business wanted to consolidate their sales activities on to a single cloud platform. The project involved implementation of **Sales Cloud** module to handle deals with clients on property sales & buying, facilitating loans ,handling of commission for clients internal & external brokers and assisting in formalities related to buying and selling properties. Project involved integrations with Okta , MDM DB, DnB , Cloudinary , OLM , RCM , Eloqua and Dealio. REST API's were the key integration technology used. The UX/UI were developed 100% in Lightning components. Data was migrated from legacy systems using Informatica cloud application. It's a multi-phase project.

Director & Project Manager ,SFDC Practice

I played dual role in this project :

As a **Sr Technical Manager & a Scrum master:**

Did team management , scrum call handling , managing sprints ,testing activities, resource management and planning. Managing challenges like scope creep , requirements on acceptance criteria , scrptint capacity planning , burn down charts , project metrics for quality assessment etc.

As a **Technical developer / configurator:**

As a *configurator* handled creation of workflow rules, process builder flows, email templates, page layout settings , validation rules , formula fields , roles and profiles with OWD settings. Creation of data model for images and file load. Usage of tools like workbench , SOQL and Eclipse. Writing test classes and designing data migration path for data loads.

As a *technical coder* developed **lightning components** for images/file upload to cloundinary web storage. Use **REST** Api's and **APEX** controller to handle the file load and updating the results back in SFDC. Wrote **trigger** to populate the data saved in opportunity to be saved in child object. Used **crypto** class to encode files in transit.

Company : **CloudUnbound Technologies, India**

Role : **Salesforce Delivery / Co-Founder**, association from 2015 April

Delivery Manager for Salesforce.com Practice , from Feb 2016 onwards till Mar 2017

As Director of CloudUnbound:

- Established a startup company with 7 resources and 3 verticals like training , solutions and services.
- Designed and architected a financial solution prototype for financial market using force.com platform
- Brought resources and force.com applications under a company frame work
- Evangelized SFDC technology in Engineering college by giving training to 45 students.
- Handled project delivery management for overseas client's in Australia.
- Handled Campaigns and Lead generation activities for CloudUnbound.
- Established connects with C-level leaders and departmental heads for generating new Client engagements.
- Forged partnerships with a similar consulting company for joint go to market in India for SFDC practice.
- Developed technology related collaterals like websites content , blogs , whitepapers etc for the organizations.
- Implementing strategies , mentoring and management of resources.
- Working on proposals , BRD's and spearheading client discovery calls sessions.
- Handled configuration work for clients like creating Workflows, validation rules , using process builder , flows , email templates , approval rules , object creation with fields , page layouts, record types and pick lists. Creation of custom objects , page layouts, record types , validation rules and email templates.
- Familiarity with basic standard controllers , VF pages to capture data and retrieval of data. Clear understanding of SOQL and SOSL languages. Understanding of REST and SOAP API calls. Understanding of IoT concepts and Data science
- Did POC with Lightning based components to demo Lightning app , communication between components using events and helper classes. Integration POC between Node.js and SFDC using REST API.

Director & Project Manager ,SFDC Practice

Company : CloudUnbound.

Client : K2Partnering for Johnson & Johnson (ASIAPAC)

Role : Application Services **Delivery Manager** , Salesforce.com Projects **Period :** 2016 July - 2017 Jan.

Highlights :

As a **Salesforce.com** Delivery Manager(Contractor) for **Johnson & Johnson**,

- Handled multiple projects under application services for multiple business units and multiple geographies. Sales cloud implementation for Japan market and Asia Pac (Australia , New Zealand and Singapore).
- Handled **Agile Scrum** master role for Total View Application project for Medical devices business unit. The project focused on giving vital information to sales people to make them focus their sales efforts on segments and accounts where there is prospects for bigger growth.
- Ensured project adhered to compliance framework dictated by SQA , ISRM and Quality. Projects also fell into category of GxP compliance.
- Designed** a reporting application for the management to get visibility on SFDC project performance in Salesforce.com.
- Handled projects that involved reusing the functionality developed for ANZ geography to be used by another geography like Korea
- Successful completion of four projects during this time on schedule , received organization wide appreciation.
- Active usage of project management tools in Salesforce like JJ Tracker for managing Sprints / User stories etc.
- Developed management reports using Dashboards and custom objects with formulae based calculations.

Company : ValueLabs Solutions (Startup of ValueLabs)

Role : **Director**, Salesforce.com practice **Period :** 2015 April - 2016 February

Highlights :

Responsible for building practice , client interactions for business development , assisting in sales and pre-sales activities for Salesforce.com. Communicating with C-level team of prospective clients , solution presentations and building SFDC team were some of the key responsibilities. Managing projects in salesforce.com and coming up with proposals and pricing for RFP's were part of the role. During this period I co-founded CloudUnbound.com and hence exited Valuelabs with mutual consent with Valuelabs management team. Overseeing development of solutions for taking to market in the SFDC knowledge area, in this responsibility completed the delivery of a marketing solution for integrating Salesforce with Send In Blue marketing application. Wrote blogs for Valuelabs to assist in marketing campaigns. Did **POC's** using Salesforce.com modules to educate customer on the application functionality as part of pre-sales process.

India Salesforce Practice Head, Dell Services

Company : Dell Services , India

Role : Delivery Manager, Salesforce.com practice (IT Manager II) **Period : 2012 Oct - 2015 March**

Highlights

- Started the **Salesforce.com** Consulting practice for Dell Services from the ground up in India , Bangalore and Noida.
- Teams reporting from Cyberjaya Malaysia , Noida and Bangalore.
- Handled massive hiring of Salesforce.com resources in various roles.
- Managed multiple projects as India Delivery manager , multiple project managers were direct reports.
- Trained fresher's and brought them up to speed in Force.com technology , lead the initiative.
- Took part in RFP's , proposal's , estimations and even architected solutions.
- Collaboration with Finance , Operations , HR , Sales and Hiring divisions.
- Implemented the SDLC process in the practice.
- Established the PMO team , audit teams and Center of Excellence for the Practice
- Took Part in Lead generation and Opportunity process from start to finish.
- Handled Coaching , Negotiations, Conflict resolutions , Planning and Strategy formulation for the practice.
- Proactively interacted with top level management in getting things done like Salary concerns , Facilities , Bonus payouts , retention plans etc.
- Handled cost estimations and pricing for proposals.
- Business development by interacting and forming alliance with partners.
- Established Support model for active projects.
- Practice had projects in **Force.com** , **Service Cloud** , **Custom Cloud** , **Sales Cloud** , **Marketing Cloud** and **Remedyforce (ITIL)**.
- Grooming Project Managers , handling promotions and HR issues.
- Attended **Dreamforce '14** , was part of the team that managed the Dell Booth and met with business partners.
- Developed application using **analytic snapshots** to periodically extract and fill custom objects and then **schedule reports** to be run on it. These reports were mailed to top management.

Analyst , Developer , SFDC, Siebel, Fusion Middleware – SOA & Amdocs ClarifyCRM

Company : Verisign /Symantec / HP (Acquisitions)

Period : Feb 2006 - Oct 2012

Project : Marketing and Sales , Content Management , Chatter rollout in **Salesforce.com** :

Worked as **Associate Manager / Business Analyst** role in the implementation of **Content** management system in **Salesforce.com** using custom cloud. Each user based on his Region was taken to a Home page specific to his location. Implemented the Marketing and Sales Lead Management , Qualification and Opportunity conversion process. As a BA coordinated with onsite and offshore resources from US and EMEA regions. Gathering requirements , interacting with Business users and onsite BA's involved major part of the work.
